Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 15-17, 19-22 and 25-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Following new agency guidelines, the first step in determining patent eligibility of a process claim involves checking whether the process claim (i) positively recites another statutory class (i.e., machine, manufacture, or composition of matter, or more colloquially, thing or product or apparatus) or (ii) transforms underlying subject matter to a different state or thing. If either (i) or (ii) is true, then the process claim qualifies as a statutory process and the examiner can proceed to the second step. Here, neither condition is true.
